

# ESG

**Align operations with regulatory ESG goals and monitor the impact of physical and transition risks and GHG emissions for individuals and businesses**

## What is CRIF ESG?

CRIF offers an extensive range of solutions and analytics designed for the assessment of the ESG performance and ESG risks of companies, supply chains and collaterals. CRIF can help organizations use ESG data to successfully complete disclosure documents, conduct Climate Stress Tests, and provide comprehensive support throughout the process. This support helps companies evaluate specific ESG Key Performance Indicators (KPIs) and develop tailored ESG scores along with governance mechanisms focused on ESG-related risks.

## Main Features of CRIF ESG?

- ESG Score
- Pan-European ESG framework
- Physical Risk Losses for Companies
- Physical Risk Losses for Collaterals
- Transition Risk Losses
- Disclosed and estimated GHG emissions
- GHG reduction targets
- Biodiversity impacts and dependencies
- G20 TechSprint 2021 winning solution
